

\$6M+ Annual Value	12,000 Users	Multiple Partner & Dell Sites	11 Years Change Management Practice
--	--	---	---

Senior Change & Transformation Leader with 19 years of enterprise experience, including **11 years of core Change Management practice** across global transformation programs at Dell Technologies spanning EMEA, APJ, and the Americas. **ADKAR Practitioner** with deep expertise in stakeholder alignment, executive engagement, resistance management, and driving sustained adoption at scale across complex, multi-stakeholder environments. A distinguishing pattern across every program: **owned transformation design and change management adoption as a single accountable role**, from operating model decisions through sustained user adoption, not as sequential handoffs between disciplines.

Delivered **\$6M+ in annual business value across up to 12,000 users spanning multiple partner and Dell sites globally**, through structured change architecture, Agile delivery integration, data-driven executive decision frameworks, and people-side engagement models. Led programs from impact assessment through sustained adoption, including cross-functional Agile sprint teams, executive persuasion using facts-and-alternatives, and pilot-led resistance resolution.

Author of 8 published practitioner frameworks spanning Digital & AI Transformation, AI Operationalization, GCC Transformation, ERP Change Management, and regional and industry adoption, including one co-authored with Ashish Sharma on Cybersecurity Workforce Transformation. All are designed as supplementary frameworks that enhance current industry standards, not replace them.

Immediate joiner targeting **Senior Manager, Director, and Consulting roles** in Change Management, OCM, Digital Transformation, AI Operationalization, and Transition Leadership.

CORE COMPETENCIES

Transformation Governance	Change Management (ADKAR)	Change Strategy & Execution
Digital & AI Transformation	AI Operationalization	Stakeholder Alignment
Adoption & Value Realization	Global Program Delivery	Transition Leadership
Partner Ecosystem Enablement	UAT & Release Management	Process Improvement / Six Sigma
Training & Communication Planning	Change Impact Assessment	Responsible AI Governance

PROFESSIONAL EXPERIENCE

Deliberate Career Break | September 2025 – Present

- Health and Wellbeing (Sep 2025–Mar 2026): Took a deliberate, structured break to fully restore health and wellbeing before re-entering the market, completed by March 2026.

- Framework Research and Development (Apr 2026–Present): Applied 19 years of enterprise transformation experience, including 11 years of core Change Management practice at Dell Technologies across EMEA, APJ, and the Americas, to independently research and build 8 original practitioner frameworks (TRANSFORM™, OPERATE™, ASCEND™, EMBED™, BRIDGE™, FORGED™, TRUST™, STEWARD™).
- Each framework was developed through a research-to-application methodology, synthesizing enterprise transformation literature and industry benchmarks with real delivery experience, then stress-tested against real-world scenarios rather than built as theory alone.
- Cross-Functional Collaboration: Co-authored STEWARD™, a 7-stage cybersecurity workforce transformation framework, with a Dell Technologies BISO (CISSP, CCSP), extending the framework methodology into an adjacent domain through direct subject-matter partnership.
- Thought Leadership: Published the completed frameworks as original practitioner IP through LinkedIn articles and a dedicated portfolio blog, building sustained engagement with a cross-industry transformation and AI audience.
- **Outcome:** Concluding the break with a published, applied body of intellectual property demonstrating Director-level strategic thinking, positioning as an immediate joiner with no notice period.

Consultant, Project Program Management — Dell Technologies (*Senior Manager Equivalent*)

Apr 2021 – Sep 2025 | Bengaluru, India

- Led enterprise-scale digital and AI transformation programs impacting **~12,000 users** across multiple partner sites and Dell sites, delivering **25–35% efficiency improvements** and **\$6M+ in annual business value** across EMEA, APAC, and the Americas.
- **Game Changer Award - Real-Time Service Parts ETA & Availability (Oct 2023 – Feb 2025):**
 - **What:** Enabling parts availability-based onsite repair scheduling for Global Client Support (CSG) organization, resolving a chronic Backlog Parts SLA failure at 20% that was causing customer dissatisfaction, repeat status calls, field engineer inefficiency, and logistics cost overruns globally
 - **How:** Conducted stakeholder impact assessment across 12,000 CSG Support users across EMEA, APJ, and the Americas; designed role-specific communication plans, capability enablement programs, and SLA governance cadence
 - **Results:** Backlog Parts **SLA improved from 20% to 7% (65% relative improvement)** · **~\$5M in annual logistics cost savings** · enhanced customer experience through real-time service visibility.
- **Game Changer Award - AI-Validated Work Orders (Jan 2025 – Aug 2025):**
 - **What:** Introduction of AI validations in the Service Work Order creation process within Salesforce CRM to automate fraud checks and exception rules for both Support Agent and Customer self-service processes globally for CSG.
 - **How:** Led change management for AI operationalization — designing shadow-mode pilot approach that allowed the AI model to run in parallel before full deployment, building user trust through evidence of accuracy before replacing manual processes.
 - **Results:** **~\$1M in annual productivity gains** through automation and fraud prevention. **AI self-service operationalized** for millions of customers globally.
- Led Citrix XenApp to VMware Horizon migration across **36 partner sites**, cutting ticket volumes by **50%** and delivering **~\$300K in annual cost savings**.
- **Change Management Approach & Methodology**
 - **ADKAR-based change architecture:** Applied ADKAR as the foundational methodology across all programs — designing structured impact assessments, stakeholder engagement plans, communication strategies, training programs, and reinforcement cadences to drive sustained adoption beyond go-live.
 - **Agile delivery integration (2020 onwards):** Represented Business and Change Management in Agile sprint teams — participating in discovery, backlog grooming, UAT, and go-live for each sprint cycle. Transitioned from quarterly waterfall releases (2014–2020) to monthly Agile sprints, and by 2023, to 2-week sprint deployments. Ensured change readiness and stakeholder alignment kept pace with accelerating delivery cadence.

- **Executive decision frameworks:** Developed and presented Facts-and-Alternatives frameworks to senior leadership for critical program decisions — including budget extensions, launch deferrals, and rollback approvals. Translated program risks into business impact KPIs, giving leadership teams clear, data-driven decision options rather than problem statements.
- **Pilot-led resistance resolution:** Designed controlled pilots to resolve leadership and user resistance with evidence rather than assertion. Demonstrated outcomes through measurable pilot data — including customer experience metrics, SLA performance, and adoption rates — before scaling across full user populations.
- **UAT governance:** Reduced system-related issues by 30% through structured UAT governance and release management across global support teams.

Senior Advisor, Partner Management — Dell Technologies (Technology Change Enablement)

Jun 2017 – Apr 2021 | Bengaluru, India

- **Game Changer Award:** Managed transformation programs across multiple global partner sites, impacting **~7,000 users** across multiple partner organizations.
- Delivered global Work-From-Home enablement for **~6,000 users during COVID-19 in 72 hours**, sustaining **~80% service levels** and avoiding **~\$1.5M in additional operational costs**.
- Led RSA SecurID MFA cybersecurity rollout across **29 partner sites** impacting **~6,000 users**, achieving full compliance with **zero critical disruptions** through site-specific change sequencing and **local champion model**.

Advisor, Project Program Management — Dell Technologies (Technology Change Enablement)

Aug 2014 – Jun 2017 | Bengaluru, India

- **Silver Award:** Reduced outsourced support **costs by ~30%**, cutting LATAM SPAM contribution from **36% to 1%**.
- **Gold Award:** Resolved **3 critical tool deployment challenges** preventing major business disruptions across global support teams.
- Led change delivery for enterprise tools impacting **~10,000 users**, enhancing adoption rates and ensuring operational stability.

IT-Enabled Operations Supervisor — Dell Technologies

Apr 2011 – Jul 2014 | Chennai, India

- **Silver Award:** Led the receiving-end onboarding of a major Dell Chennai transition program. Scaled the regional organization from **0 to 115 FTEs in 14 months**, establishing a high-performing unit generating **\$2.1M** in revenue
- Managed **49 FTEs directly for 3 years and 66 FTEs indirectly for 1.5 years**
- **Tell Dell Rock Star x2:** Recognized for consistent adherence to Dell's People Strategy (2011, 2012, 2013).
- *This role marks the conclusion of 8 years in Business Operations before transitioning to core Change Management practice from August 2014.*

Analyst → Senior Analyst → Associate Process Manager — eClerx Pvt Ltd.

Oct 2006 – Mar 2011 | Mumbai / Pune, India

- Managed **19 FTEs directly and 5 FTEs** indirectly across eCommerce operations including Brand Input/Content Maintenance, Global Web Store Audits, and XML Feed creation for Online Marketing, SEO, and SEM.
- Led a team of **10 FTEs** supporting product configuration maintenance for Dell Technologies.
- Participated in **Six Sigma Yellow Belt program** to improve quality and productivity levels.

EDUCATION
