SELVAKUMAR JAYAKRISHNAN

Senior Change & Transformation Leader · Digital Transformation & AI Adoption · 19 Years Experience

Bengaluru, India | Immediate Joiner | +91 9036000220 | selvakumar.jayakrishnan@hotmail.com

linkedin.com/in/passionateselva | selvakumarjayakrishnan.com

$6M+	12,000	50+	11 Years
Annual Value	Users	Sites, 10 Organizations	Change Management Practice

Senior Change & Transformation Leader with 19 years of enterprise experience, including **11 years of core Change Management practice** across global transformation programs at Dell Technologies spanning EMEA, APJ, and the Americas. **ADKAR Practitioner** with deep expertise in AI adoption and enablement, stakeholder and change impact assessment, communications and training, adoption KPIs and measurement, stakeholder alignment, executive engagement, resistance management, and driving sustained adoption at scale across complex, multi-stakeholder environments. A distinguishing pattern across every program: **owned transformation design and change management adoption as a single accountable role**, from operating model decisions through sustained user adoption, not as sequential handoffs between disciplines.

Delivered $6M+ in annual business value across up to 12,000 users spanning multiple partner and Dell sites globally, through structured change architecture, Agile delivery integration, data-driven executive decision frameworks, and people-side engagement models. Led programs from impact assessment through sustained adoption in cross-functional Agile sprint teams.

Author of 8 published practitioner frameworks spanning Digital & AI Transformation, AI Operationalization, GCC Transformation, ERP Change Management, and regional and industry adoption, including one co-authored with Ashish Sharma on Cybersecurity Workforce Transformation. All are designed as supplementary frameworks that enhance current industry standards, not replace them.

Immediate joiner targeting **Senior Manager, Director, and Consulting roles** in AI Adoption Strategy, Change Management, OCM, Digital Transformation, AI Operationalization, and Transition Leadership.

CORE COMPETENCIES

AI Operationalization	Adoption KPIs & Value Realization	Responsible AI Governance
Training Content & Enablement	Change Management (ADKAR)	Executive Decision Frameworks
Digital & AI Transformation	Stakeholder Assessment & Alignment	Change Impact Assessment
Communication Planning & Content	Change Strategy & Execution	Transformation Governance
Global Program Delivery	UAT & Release Readiness	Agile Delivery Integration

PROFESSIONAL EXPERIENCE

Deliberate Career Break | September 2025 – Present

- Health and Wellbeing (Sep 2025–Mar 2026): Prioritized health first, then used the space to upskill deliberately.
- Framework Research and Development (Apr 2026–Present): Applied 19 years of enterprise experience, including 11 years of core Change Management practice, to independently research and build the 8 original practitioner frameworks above, each stress-tested against real-world scenarios rather than built as theory alone.
- Cross-Functional Collaboration: Co-authored STEWARD™, a 7-stage cybersecurity workforce transformation framework, with a Dell Technologies BISO (CISSP, CCSP), extending the framework methodology into an adjacent domain through direct subject-matter partnership.

- Thought Leadership: Published the completed frameworks as original practitioner IP through LinkedIn articles and a dedicated portfolio blog, building sustained engagement with a cross-industry transformation and AI audience.
- AI Practitioner Upskilling: Use AI tools daily as a practitioner for research, framework development and content, and directed AI-built automations, including the selvakumarjayakrishnan.com portfolio website.
- **Outcome:** A published, applied body of IP demonstrating Director-level strategic thinking.

Consultant, Project Program Management — Dell Technologies *(Senior Manager Equivalent)*

Apr 2021 – Sep 2025 | Bengaluru, India

- Led enterprise-scale digital and AI transformation programs impacting **~12,000 users** across multiple partner sites and Dell sites, delivering **25–35% efficiency improvements** and **$6M+ in annual business value** across EMEA, APAC, and the Americas.
- **Member of the Change Management Office (CMO)**, driving change strategy, stakeholder engagement, communications, enablement, value realization and post change impact assessments across these programs. **Capability Enablement lead** for the Work Order group of 4.
- **Game Changer Award (one award across two programs, Oct 2023 – Aug 2025):**
    - **AI-Validated Work Orders (Jan 2025 – Aug 2025)**
        - **What:** Introduction of AI validations in the Service Work Order creation process within Salesforce CRM to automate fraud checks and exception rules for both Support Agent and Customer self-service processes globally for CSG.
        - **How:** Led change management for AI operationalization, designing a shadow-mode pilot approach that allowed the AI model to run in parallel before full deployment, building user trust through evidence of accuracy before replacing manual processes.
        - **Results: ~$1M in annual productivity gains** through automation and fraud prevention. **AI self-service operationalized** for millions of customers globally.
    - **Real-Time Service Parts ETA & Availability (Oct 2023 – Feb 2025)**
        - **What:** Enabling parts availability-based onsite repair scheduling for Global Client Support (CSG), resolving a chronic Backlog Parts SLA failure at 20% that drove customer dissatisfaction, repeat status calls, field engineer inefficiency, and logistics cost overruns globally
        - **How:** Conducted stakeholder impact assessment across 12,000 CSG Support users across EMEA, APJ, and the Americas; designed role-specific communication plans, capability enablement programs, and SLA governance cadence
        - **Results:** Backlog Parts **SLA improved from 20% to 7% (65% relative improvement) · ~$5M in annual logistics cost savings** · enhanced customer experience through real-time service visibility.
- Led **business change and user enablement** for the Citrix XenApp to VMware Horizon migration across **36 partner sites**, cutting ticket volumes by **50%** and delivering **~$300K in annual cost savings.**
- **Change Management Approach & Methodology**
    - **Executive decision frameworks:** Developed and presented Facts-and-Alternatives frameworks to senior leadership for critical program decisions, including budget extensions, launch deferrals, and rollback approvals. Measured adoption, SLA, and ticket-volume outcomes and translated program risks into business impact KPIs, giving leadership teams clear, data-driven decision options rather than problem statements.
    - **Pilot-led resistance resolution:** Designed controlled pilots to resolve leadership and user resistance with evidence rather than assertion. Proved outcomes with measurable pilot data on customer experience, SLA performance, and adoption before scaling across full user populations.
    - **ADKAR-based change architecture:** Applied ADKAR as the foundational methodology across all programs, designing structured stakeholder and change impact assessments, engagement plans, risk mitigation, communication strategies, training programs, and reinforcement cadences to drive sustained adoption beyond go-live.
    - **Communications and enablement leadership:** Owned executive and wide-reach pre-launch and post-launch communications and role-specific enablement, from content and training materials to the SLA governance cadence.
    - **Agile delivery integration (2020 onwards):** Represented Business and Change Management in Agile sprint teams, participating in discovery, backlog grooming, UAT, and go-live for each sprint cycle. Moved from quarterly waterfall releases (2014–2020) to monthly Agile sprints, and by 2023 to 2-week sprints, keeping change readiness and stakeholder alignment in step with the cadence.
    - **UAT governance:** Reduced system-related issues by 30% through structured UAT governance and release management across global support teams.

Senior Advisor, Partner Management — Dell Technologies *(Technology Change Enablement)*

Jun 2017 – Apr 2021 | Bengaluru, India

- **Game Changer Award:** Managed transformation programs across multiple global partner sites, impacting **~7,000 users** across multiple partner organizations.
- Delivered global Work-From-Home enablement for **~6,000 users during COVID-19 in 72 hours,** sustaining **~80% service levels** and avoiding **~$1.5M in additional operational costs.**
- Led RSA SecurID MFA cybersecurity rollout across **29 partner sites** impacting **~6,000 users**, achieving full compliance with **zero critical disruptions** through site-specific change sequencing and **local champion model.**

Advisor, Project Program Management — Dell Technologies *(Technology Change Enablement)*

Aug 2014 – Jun 2017 | Bengaluru, India

- **Silver Award:** Reduced outsourced support **costs by ~30%,** cutting LATAM SPAM contribution from **36% to 1%.**
- **Gold Award:** Resolved **3 critical tool deployment challenges** preventing major business disruptions across global support teams.
- Led change delivery for enterprise tools impacting **~10,000 users,** enhancing adoption rates and ensuring operational stability.

IT-Enabled Operations Supervisor — Dell Technologies

Apr 2011 – Jul 2014 | Chennai, India

- **Silver Award:** Led the receiving-end onboarding of a major Dell Chennai transition program. Scaled the regional organization from **0 to 115 FTEs in 14 months,** establishing a high-performing unit generating **$2.1M** in revenue
- Managed 49 FTEs directly for 3 years and 66 FTEs indirectly for 1.5 years · Six Sigma Green Belt trained
- **Tell Dell Rock Star ×2:** Recognized for consistent adherence to Dell's People Strategy (2011, 2012, 2013).

Career transition: After 8 years in Business Operations (Oct 2006 – Jul 2014), moved into core Change Management practice in August 2014.

Analyst → Senior Analyst → Associate Process Manager — eClerx Pvt Ltd.

Oct 2006 – Mar 2011 | Mumbai / Pune, India

- **Associate Process Manager** - Managed **19 FTEs directly and 5 FTEs** indirectly across eCommerce operations including Brand Input/Content Maintenance, Global Web Store Audits, and XML Feed creation for Online Marketing, SEO, and SEM.
- **Senior Analyst** - Led a team of **10 FTEs** supporting product configuration maintenance for Dell Technologies.
- Completed the **Six Sigma Yellow Belt program** to improve quality and productivity levels.

EDUCATION

B.Sc. (Physics Major) — Mumbai University · 2003–2006. *College topper, ranked 24th, Mumbai University.*

Diploma, Computer Hardware & Networking — YCMOU, 2003–2005. *Topper of the batch.*
